

TopBlock

# What Are The Block NFTs?

They are whatever you want them to be...

Each block NFT is a Key to your own permissionless publishing platform within the [topblock.app](https://topblock.app) ecosystem.

A deflationary NFT collection with high utility. 🗝️

# What is the utility of Block NTFs?

Each block occupies a percentage of the main page in the TopBlock ecosystem. It could be compared to a **digital real state** powered by the blockchain.

Each block has a *specific location, dimensions and ability to render content* according to its category.

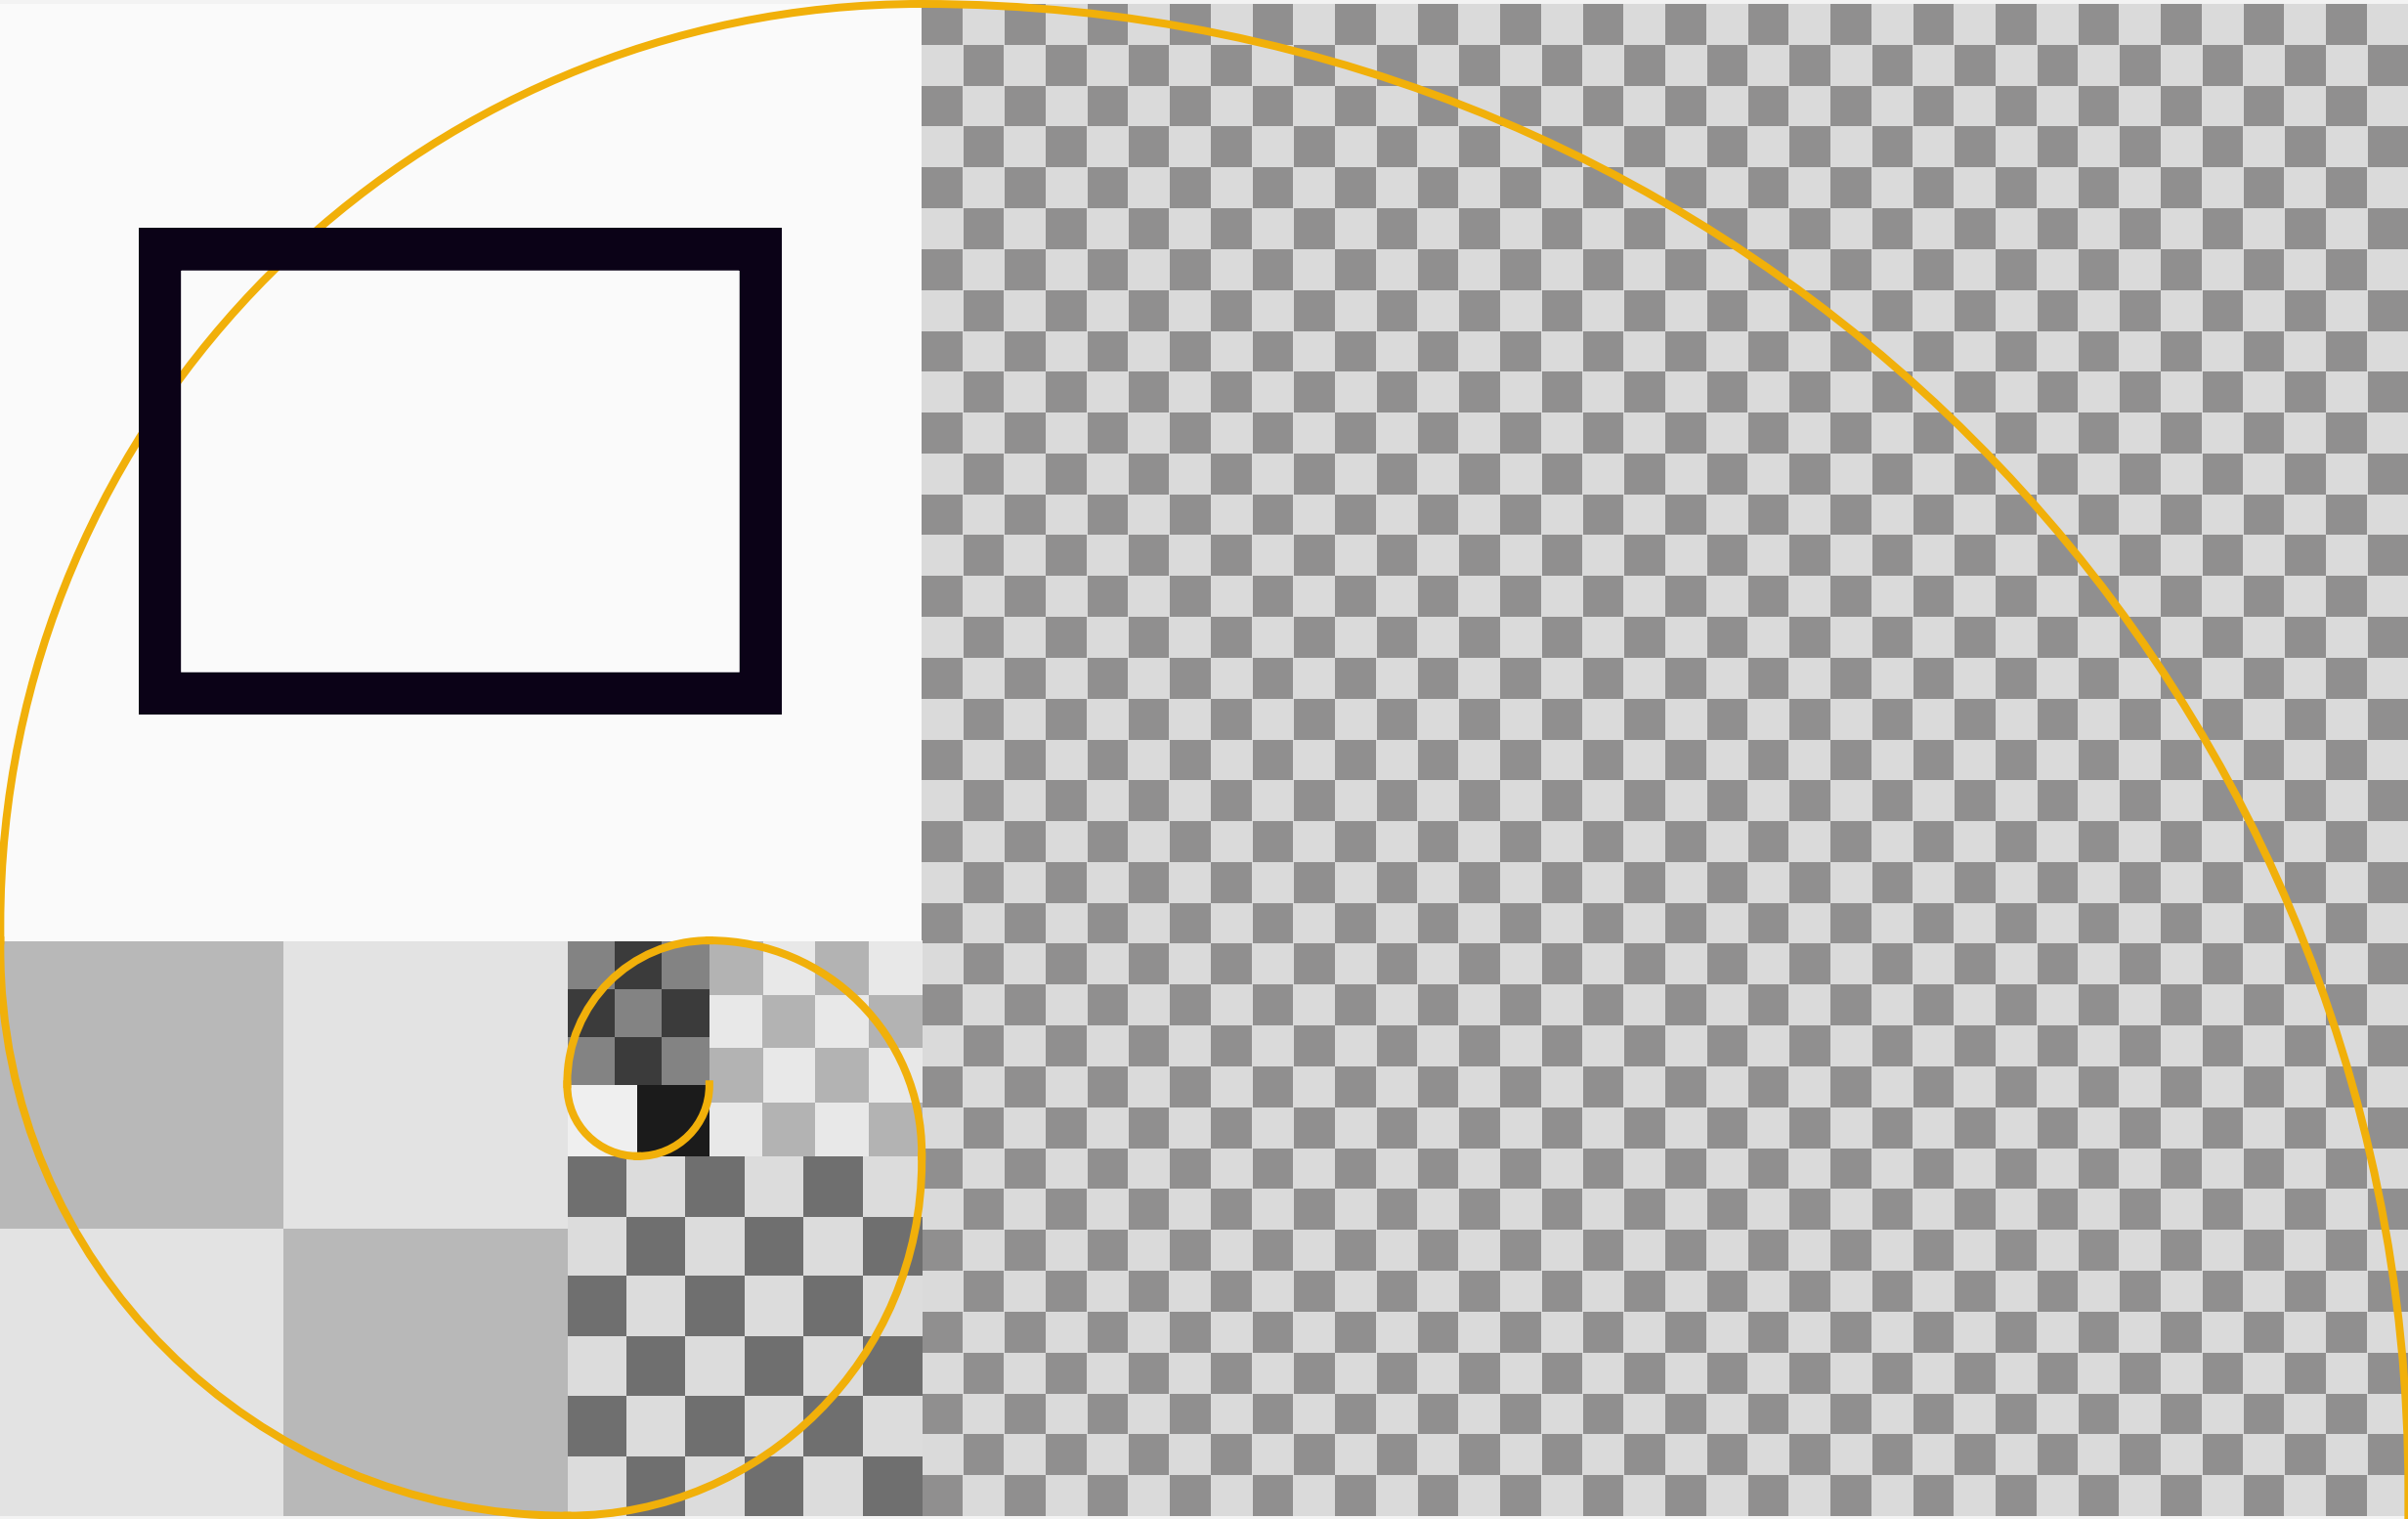

Once a user clicks on a block, they are directed to it's own *dedicated page* that displays the content that its owner has predefined.

The owner of a block can Freely edit the content of his block.

Express yourself, shill your Favorite crypto assets or advertise. *Do what you want in your block.*

We are developing a Web App that will live in the TopBlock From which the entire community will benefit.

# The sale of the TopBlock

The community will continue to mint other NFTs with high utility, artistic and social value for which the *Web App* that will live within the TopBlock will be fundamental.

Part of the proceeds from the sale of these NFTs and the royalties *will be* automatically deposited in a treasury destined to accumulate 42,069 ETH (smart contracts don't lie). Once the deposit is filled, it will be distributed to *qualified app users* and the process will restart in perpetuity as long as the app is running and the community allows it.

**In case of failure or closure of the app**, neither the users, nor the founders, nor the development team will access the accumulated funds (regardless of their amount). These will be sent to a burner wallet. We are in this together.

It is the only **EXPLICIT COMMITMENT** we will make for now.

# TopBlock Proceeds Distribution

When the TopBlock is sold (42,069.00 ETH), the proceeds will be distributed as follows:

- 69% = 29,027.61 ETH to qualified app users\*.
- 11% = 4,627.59 ETH the app users will decide.
- 10% = 4,206.90 ETH to the development treasure.
- 10% = 4,206.90 ETH to the Founders.

Only 580,540 app users will qualify for distribution of proceeds from the TopBlock sale. Each will receive 0.05 ETH.

\* The term "qualified app users" is not limited to Block NFT holders. More details about who qualifies as "app user" will become clear as the ecosystem evolves. 🙄🙄

# Roadmap

NO PROMISES, just one Feature at a time:

- Fill blocks.
- ~~- Fill TopBlock.~~
- ~~- Undisclosed.~~
- ~~- Undisclosed.~~
- ~~- Undisclosed.~~
- ~~- Undisclosed.~~
- ~~- Undisclosed.~~

We are in this For the long haul. 🙄

Happy Blocks...
